SKILLS

TESTING TYPES

- Functional testing
- Regression testing
- Smoke / Exploratory
- Pre-release and hotfix checks
- Release validation

TESTING / DOCUMENTATION

- Web and desktop testing
- Test plans, checklists, test cases
- Requirements and documentation review
- Data-heavy tasks, logs, JSON/XML
- Bug reporting & defect tracking

TOOLS AND PLATFORMS

- Jira, Confluence, Google Docs
- Android, iOS, Web, Desktop
- NOX, Android Studio
- Git, GitHub Actions (CI/CD), Linux, Docker
- Postman, Swagger
- Python, SQL

ADDITIONAL

LANGUAGES

Russian

Native

English — B1

Reading documentation; written and spoken communication

PROFILE

QA Engineer with **5+ years** of experience in manual testing of cross-platform products on Android, iOS, Web and Windows. Core areas: functional and regression testing, requirements review, test documentation, bug reporting, log analysis and data-heavy tasks. Initiated an internal **AI-assisted QA tool** that automated routine checks across 6 areas and reduced manual verification time from several hours to 15–20 minutes. Growing towards Technical QA: Python, SQL, API testing, Git, CI/CD.

WORK EXPERIENCE

GAMETEQ

QA Engineer · Tbilisi, Georgia / Remote

Sep 2022 — Present

Projects: Vikings: War of Clans, Throne: Kingdom at War (Android, iOS, Web, Windows)

Continued working on the same projects after the team transitioned from Plarium. Continuous experience since March 2021.

- Test new features, regression, pre-release builds and hotfix changes across all platforms: Android, iOS, Web and Windows
- Verify product functionality: new features, integrations, user scenarios, UI elements and visual content
- Validate implementation against Jira tasks, documentation, mockups, Excel/Google Sheets and logs; identify discrepancies before release
- Review documentation for new features: identify ambiguities, inconsistencies and negative scenarios before testing starts
- Test localization, UI texts, news, FAQ/portal texts, visual elements and VFX
- Work with data-heavy tasks: verify large volumes of values across Excel/Google Sheets, Jira, logs and the client
- Collaborate with developers, analysts and the product team to clarify requirements and resolve task-related issues
- Create and maintain checklists and test cases to support comprehensive test coverage

INITIATIVES

- ♦ Initiated and developed an internal **AI-assisted QA tool** for automating routine QA tasks. Covers 6 check types: balance checks, localization, text content, FAQ and product data. Result: reduced check time by 70% (from several hours to 15–20 minutes) and minimized the risk of human error.
- ♦ Prepared internal QA documentation: practical guidelines and working materials for the team. Reduced onboarding time for new team members.
- ♦ Proposed and drove improvements to the internal debug panel: introduced new commands and UI controls for faster test environment setup, reducing the number of manual actions required for routine QA tasks. Used by the entire team daily.

Plarium

Quality Engineer · Krasnodar, Russia

Mar 2021 — Aug 2022

Projects: Vikings: War of Clans, Throne: Kingdom at War (Android, iOS, Web, Windows)

- Performed manual testing of new features: UI/UX, localization, visual elements
- Validated implementation against Jira tasks, documentation, mockups, Excel/Google Sheets and logs
- Participated in regression testing, pre-release checks, release validation and hotfix verification
- Reported and tracked bugs in Jira; verified fixes on required platforms and builds
- Participated in feature documentation review: identified ambiguities and negative scenarios before testing started

EDUCATION

Kuban State University

Specialist degree — Fundamental Mathematics and Mechanics
2012 — 2017
